SUMMARY

Operationally-driven Mathematics and Electronics & Communication undergraduate with hands-on experience leveraging AI tools daily to automate workflows, optimize processes, and support high-priority initiatives — including writing scripts to automate repetitive workflows. Experienced in full-stack mobile development using Flutter, Firebase, and Supabase, with a strong focus on efficiency, scalability, and directly supporting a founder's time and critical tasks.

TECHNICAL SKILLS

Languages: Java, Python, C, Dart

Frameworks & Tools: Flutter, Firebase, Supabase, React Native, Docker, PostgreSQL

Core Areas: Mobile Development, API Integration, UI/UX Design, System Design, Process Automation

AI & Automation: Claude Code, Codex, Cursor, GitHub Copilot; automation scripting (Python/Bash), workflow optimization, prompt engineering, task automation

EXPERIENCE

Deepshorts.ai

Feb 2025 – Mar 2025

Mobile App Developer Intern

Remote

- Engineered the MVP frontend using Flutter, focusing on performance and scalability to ensure efficient user operations and a robust foundation for future growth.
- Connected backend APIs and validated endpoints using Postman, improving reliability and reducing integration failures in the development workflow.
- Leveraged Docker and PostgreSQL to streamline backend development workflows, directly enhancing process optimization and operational efficiency, crucial for managing critical tasks.
- Collaborated effectively in an agile environment, consistently prioritizing and delivering features under tight timelines, demonstrating strong time management, prioritization, and accountability essential for autonomous work.

Swyp AI

Mar 2025 – Apr 2025

Mobile App Developer Intern

Remote

- Built and maintained frontend features using Flutter, ensuring smooth UI performance across platforms, directly improving user retention and operational reliability.
- Collaborated with the design team to implement pixel-perfect, responsive interfaces from Figma mockups, prioritizing delivery speed and design accuracy.

Hudson

June 2024 – Sept 2024

Web App Development Intern

Remote

- Architected a war-game simulator for the Japanese Army using Flutter, translating complex operational requirements into a functional, scalable application.
- Developed budget-tracking and map-based simulation tools, directly supporting operational planning and enhancing decision-making efficiency for non-technical users.
- Delivered a lightweight, user-friendly application for non-technical users, demonstrating the ability to align technical output with operational and strategic goals.

PROJECTS & FREELANCE WORK

Driving Theory Kit | *Freelance, Climacrew UK* | *Client: Hem Shah*

2025

- Built a full-stack mobile app using Flutter and Firebase, replacing an outdated system and significantly improving operational efficiency and user experience.
- Crafted a DVSA-compliant UI to improve usability and navigation, demonstrating attention to regulatory requirements and non-technical user needs.
- Optimized app performance, resulting in measurably higher engagement and ratings — a direct impact on the client's product goals.

Striide | *Freelance, Striide USA* | *Client: Nidhi*

2025

- Built a cross-platform mobile app using Flutter to enhance women’s safety through community-driven incident reporting, managing the full project lifecycle autonomously.
- Engineered backend services with Supabase, including phone and email authentication, ensuring secure and scalable system operations.
- Used AI-assisted scripting to automate repetitive tasks in the development process, reducing manual overhead.

Waves App 2024 | *BITS Pilani Goa* | *Senior App Developer*

Sept 2024 – Nov 2024

- Built and shipped the official Waves app, achieving 5,000+ downloads on the Play Store, demonstrating end-to-end ownership and accountability for a high-visibility product.
- Implemented backend logic and incorporated secure payment systems using Firebase, ensuring robust and reliable financial operations.
- Delivered a responsive UI for real-time event schedules and live updates using Flutter, prioritizing operational reliability under peak usage.
- Collaborated in a fast-paced team to deliver production-ready features on time, exercising strong prioritization and time management skills.

EDUCATION

BITS Pilani, KK Birla Goa Campus

Expected 2028

M.Sc. Mathematics + B.E. Electronics & Communication

Hill Top School, Jamshedpur

2022

Class XII (ISC) — 94.5% | Class X (ICSE) — 92%
